

Slickline Units

Truck mounted Slickline unit. This unit is designed to operate in a wide variety of oilfield environments and can be modified to perform as a Wireline truck for logging and perforating applications.

It features the utilization of the rear truck cab as an operational platform. Includes "Hit it now" drum response for quick down-hole tool action and an ergonomically designed control panel.

Drum wireline capacity is configured to customer requirements. Drum Drive Performs at a Drum Speed Up to 2000 fpm with up to 6,000 lbs of pulling power. Training/Commission of unit conducted at customer location.

Wireline truck accessory options include multiple size drum draw works to fit desired slickline and braided line sizes (split drum or double drum available).

The winch hoist specifies a 3 & 4 speed Funk transmission chain drive with 2 speed hydraulic motor.
