

# Wireline Units

Single and tandem axle heavy duty Wireline units for cased hole service applications. Units are designed to operate in rough terrain environments. Trucks are fitted with air ride suspension to lesson shock load during transportation on rough roadways. Precise is a custom manufacturer that can build these units in any configuration required by our customers. Every Precise customer has final design approval prior to construction implementation of their equipment.

Wireline truck body design has 30 degree rear slope or rolled radius. 1/8" aluminum box frame set on 12 inch centers, all welded construction. 3M bonding tape is utilized to affix exterior and interior skin to frame work. Industrial grade thermal insulation utilized. Ergonomically designed control panel for ease of operation.

Wireline Truck Accessories Options: Draw works: Multiple size drum draw works available for desired E-Line sizes, split, double and single drum draw works are available.

Drum Drive Performance: Drum Speed - Up to 1,300 FPM. Pulling Power- Up to 12,500 LBS. Excellent low speed logging control, minimum 5 fpm and repeatable via preset point.

Training/Commission of equipment to be conducted at customer's location.
